

INDEX TO VOLUME 50

ARTICLES

- Acquainting Science Teachers with the Social Impact of Science and Technology, Henry Winthrop, 482-484.
- Analysis of Science Courses Designed for General Education, The, William F. Pelham, 337-345.
- Anna May Gemmill: 1878-1962, Clarence M. Pruitt, 89-90.
- Aquatic Animals in an Elementary School, An Experiment with, Joanna Burger, 175-183.
- Assessing Quality in Graduate Education, Allan M. Cartter, 251-258.
- Assessing Teaching Effectiveness: The State of the Art, Gladys S. Kleinman, 234-238.
- Assessing the Progress of Education, Ralph W. Tyler, 239-242.
- Attitude—Building Aspects of Nature Study, The, John A. Gustafson, 115-118.
- Beginning Science Teachers, What Work Is Performed by?, T. A. Nelson, 346-353.
- Benjamin Charles Gruenberg: 1875-1965, Clarence M. Pruitt, 83-89.
- Biotic Communities in Teacher Training, Using Campus, Paul Egan Hafer, 160-166.
- BSCS Program's Variable Factor, The, Jerry B. Davis, 221-222.
- Can Industry Help Our Schools? Harold T. Glenn, 328-329.
- Carefully examining the Bible, Willis J. Dunn, 8-11.
- Children's Attitudes Towards Elementary School Science, Alex F. Perrodin, 214-218.
- College Program for the Disadvantaged, A, Morris Meister, 406-408.
- Comparison of Item Statistics for Items in Multiple—Choice and in Alternative—Response Form, Mary Alice Burmester and Le Roy A. Olson, 467-470.
- Cooperative Development of Unit Achievement Tests in High-School Biology, John Schmitt, John Montean, David Robinson, and Paul Joslin, 460-464.
- Contributions of Frederic Ward Putnam to the Development of Anthropology in California, Ralph W. Dexter, 314-318.
- Current Practices in Science Teaching in the Junior High Schools of Texas, Lloyd M. Bennett, 142-151.
- Dalton Bicentennial: A Teacher by Choice, Gladys S. Kleinman, 464-466.
- Dr. Samuel M. Nabrit, Clarence M. Pruitt, 417.
- Dual Progress Plan in the West Irondequoit Central School District, The, John J. Montean, 39-43.
- Effect of Varied Presentations of Laboratory Exercises Within Programed Materials on Specific Intellectual Factors of Science Problem Solving Behavior, Donald Nasca, 437-457.
- Effects of Fatigue on Recall, The, Robert G. Marsh, 12-18.
- Effects of Frustration on Intellectual Performance, The, C. J. Ho, 457-460.
- Elementary Teachers Keep Up-to-Date in Science, How, Arthur L. Costa, 126-127.
- Eppur Si Muove, Rufus Suter, 172-175.
- Evaluating a Science Course, One Method of, Nicholas D'Ambrosio, 330-332.
- Evaluating Educational Outcomes, John C. Flanagan, 248-251.
- Evolution of the High School Chemistry Text and Present Implications, Lee R. Summerlin and Sara P. Craig, 223-233.
- Formal Relations in Elementary School Science, Herbert L. Mason, 166-169.
- Frederic Booth Dutton, Clarence M. Pruitt, 97-102.
- Frederick Linder Fitzpatrick, Clarence M. Pruitt, 297-300.
- Frustration on Intellectual Performance, The Effects of, C. J. Ho, 457-460.
- Harry Craig Sipe, Clarence M. Pruitt, 193-196.
- Inductive Approach to Teaching Elementary Science, An, Lloyd M. Bennett, 31-33.
- Inquiry in the High School Science Laboratory, James A. Rutledge, 411-417.
- Interdisciplinary Approach to Science Teaching for General Education on the College Level, An, Pauline Gratz, 285-292.
- Interest Test, An, Paul A. Winder, 371-373.
- Laboratory Methods Build Attitudes, George Charen, 54-57.
- Manpower, Money, and Molecules: New Approaches to Undergraduate Education in the Biological Sciences, James H. Mathewson, 169-171.
- Mass Education and the New Science, Frank X. Sutman, 494-496.
- Measurement of Quality in Education, Charles S. Benson, 283-285.
- Measurement of Quality in Education, Alexander M. Mood, 279-283.
- Mid-Latitude Biology, Beyond, G. L. Daniels, 187-191.
- Milton Orville Pella, Clarence M. Pruitt, 1-4.
- Morris Meister, Clarence M. Pruitt, 401-406.
- Nature Lore at Garrettsville As Revealed by the Diaries of George J. Streater, 1881-1887, Ralph W. Dexter, 34-39.
- Nature of Science: A Translation, The, Trudi Kaslov, 492-494.
- Need for Science Consultants, The, Bernard Reinisch, 52-54.
- Needed: A Change of Accent for Higher Education, David M. Delo, 4-7.
- N.S.F. Research Participation Program for High School Teachers, A Personal Look at, Robert L. Wanek, 293-296.

- Origin of Life on Earth or Elsewhere, Some General Problems Relative to, Harold C. Urey, 108-111.
- Pennsylvania Plan, The, Henry S. Dyer, 242-248.
- Physics and History, Seymour W. Itzkoff, 485-489.
- Prehistoric Sea Monsters and the Modern Lamprey Eel, Arthur H. Bryan, 81-82.
- Principle of Le Chatelier, A Method of Illustrating the, Paul Westmeyer, 392-394.
- Professional Projections of Future Science and Technology and Their Bearing on Social Change, Henry Winthrop, 471-481.
- Progress and Achievements of Science, The, Josef Weiser, 43-46.
- Progress Report of An Experimental In-Service Institute in Science for Elementary School Teachers of Grades K-6, Gladys S. Kleinman, 136-140.
- Project Ultra and Student Advisement, Sylvia Washon, 21-22.
- Pupil Problems in Learning Secondary School Biology, Ivon E. Culver, 353-358.
- Quality Measurement Project in New York State, The, William D. Firman, 259-279.
- Quiet Revolutionists, The, Morris Goran, 335-336.
- Recent Studies in Marine Bacteriology, Arthur H. Brown, 76-81.
- Rensselaer and Bridgewater: A Footnote in the History of American Scientific Education, Louis I. Kuslan, 64-68.
- Research Ability, Samuel Strauss, 418-437.
- Retention of Learnings in High School Chemistry for a Period of a Year, A Study of the, John R. Smeltz, 359-370.
- Review of Fifty Years of Science Teaching and Its Implications, A. R. C. Bradley, N. Wesley Earp, and Troy Sullivan, 152-155.
- Science and Industrial Arts, E. Foster Arthur, 379-385.
- Science Education and the Disadvantaged: Adapting Curriculum Reforms to the Special Requirements of the Disadvantaged, Morsley G. Giddings, 206-212.
- Science Fairs in Pakistan, Ann Lucas, 111-115.
- Science Interests of Future Teachers, The, Robert C. Craig, 373-378.
- Science Problems: Vehicles to Develop Measurement Principles, Marlin L. Languis and Lorren L. Stull, 47-49.
- Science Talent among High School Freshmen, Search for Sybil L. Daniels, 385-391.
- Secondary Education and the Philosophy of Science, Sol Segal, 91-94.
- Self-Evaluation by Physical Science Instructors, Ray H. Simpson, 58-64.
- Social Behavior of Non-Human Primates in Captivity, H. Ned Seelye, 69-75.
- Social Impact of Science and Technology, Acquainting Science Teachers with the, Henry Winthrop, 482-484.
- Society vs. The Individual, Robert G. Marsh, 18-20.
- Southern Bell System Aids to Education, Charles C. Nelson, 140-142.
- Statistical Controls in Educational Research, Philip H. DuBois, 156-159.
- Strengthening Science Education for Youth and Industry: Factors in the Early Motivation of Scientists, Morris Meister, 409-410.
- Studies in Mass Media, 1949-1965, Paul Witty, 119-126.
- Student-Centered Teaching in High School Chemistry: An Exploratory Study, Elaine W. Ledbetter, 183-186.
- Subject Organization Proposed for Teaching Related-Fields Concepts Required to Learn Earth Science Concepts in the Junior High School, Loren T. Caldwell, 26-31.
- Teacher Training Programs in the United States, Frederic B. Dutton, 102-107.
- Teachers Institute for the Development of Outdoor Science and Conservation Instruction, The, Phyllis S. Busch, 213-214.
- Teacher's Right Arm: Cooperation in Teaching Science, The, Hubert D. Moore, 50-52.
- Teaching Intern Program in Biology and Chemistry, Richard G. Yalman, 309-313.
- Teaching of Science in the Secondary Schools of Montana, The, James Warren Gebbhart, 319-324.
- Teaching Science for Creativity, Nathan S. Washon, 22-25.
- Teaching Statistics to Beginning Graduate Students in Education by Using Transparencies, Lloyd M. Bennett, 490-492.
- Team Teaching Science at University School, H. M. Henneby and Catherine Wiegand, 203-205.
- Thematic Approach to Physics, A, Maurice J. McCauley, 301-308.
- To Buy or to Build: That is the Question, Harry E. McAnarney, 219-221.
- Toward a "Comparative Anatomy" of the Curriculum Studies, W. C. Van Deventer, 196-203.
- Unfounded Beliefs, A Study of, Clifford A. Boyd, 396-398.
- Urban Field Guide to Elementary Science, An, Phyllis S. Busch, 128-135.
- Use the Extracurriculum Too, Homer H. Hamilton, 394-396.
- Variability in Grading Practices of Instructors of a Multiple-Section Natural Science Course, Eldridge E. Scales, 332-335.
- Why Are High School Students Avoiding the Physical Sciences? F. G. Yale, 325-328.
